

Design Project Manager

Reports to: Design Manager

The part I play at Flagship Group to help solve the housing crisis is:

To provide support to the Design Manager and Design Team in securing schemes to deliver the Group's business plan.

I work alongside the Pre-Construction team to progress scheme designs through to handover to the Delivery Team. I lead on the progression of scheme designs through the planning process to secure planning permissions and support the pre-construction team in assessing new business opportunities, undertaking assessments and using relevant software.

My skills and experience include:

I have a background in architecture, with good knowledge of the housing development sector.

I'm astute in technical appraisals and reviews of technical reports such as drainage, ecology, highways, ground, soil investigations. I'm proficient at producing drawing packages using AutoCAD and proficient in Photoshop.

I'm educated to A-level standard or Equivalent and hold a Professional Membership or Degree in architecture or equivalent.

I hold a full valid UK driving license.

The skills I will develop include:

leading on design from conception to completion, developing my knowledge and skill set in Architecture.
